COUNCIL AND STREET **COMMISSIONER TILT** ON LATTER'S WORK

Request of Stouffer for an Assistant Draws Forth Sharp Criticism.

DECKER QUESTIONS EFFICIENCY

Quarrel Canses Charge of Meddling by the Department Head and Becomes so Heated, President Millard Forced to Call for Order.

Criticism of the Street Department draw hot returns from Gouncilinen which were answered by Street Com-missioner Stouffer at a thref-hour session of Council last alght. Most of th tine was devoted to hearing reports of the recent storm damage. Reported astivities of certain members of Council in ordering the Street Commissioner to divide his force of men into squads of two o, three and send them to various parts of the city, as well as employing andesicable laborers, drew vigorous remarks from Council and a hot reply from the Street Countissationer. Discussion began when Chalman Simon Bay, of the Street Committee, recommended the appointment of an assistant street commissioner, declaring the three was too much work for one time was devoted to hearing reports o

assistant street commissioner, declarling there was no much work for one
man while the storm damage is being
repaired. Hay also recommended a
horse and light wagon to convey men
and materials from one section of town
to unother. Fried declared he could not
understand why an assistant street
commissioner was needed, and Clark,
thought is advisable to make such an
appointment for two months. Clark
also moved that the street force be increased. Decker followed with the suggestion that the city advertise for bids
and declared that, with the sume

force of men, he come accompass more in a day than is being done in a week. This drew Commissioner Stouffer's retort that Councilman had been medding in his work. Detker hastened to state he was making no reflections upon the street commissioner, at the same time drawing sharp reforts from Chairman Hay, or the Street Committee. The tilt between the two Councilmen became so hot Friel declared they were out of order. President Miliard then rapped for order. Miliard instructed Stouffer to continue his work under the direction of Chairman Simon Hay, and, during Haya' absence, Councilman Clark will be "second in command."

The Street and Sewer Committee reported damage in all parts of the city Several property awarers complained of damage. They were referred to the Street and Sewer Committees. In some Instances, repairs were ordered immediately.

New Fall Suit

While the Assortment of Styles is at its Best.

Yes, it's a satisfaction to buy early. Everything is new to you—the styles, the cloths and entire stock gives you an enthusiasm you don't get after they have been picked over. Besides getting what best suits you, in buying early you get longer service. Even though you haven't made up your mind to buy now, we invite you to come and study the styles and examine the quality and workmanship of our garments. Coats are longer, square or cut away, plaited skirts, new collars, cuffs, etc., shown in French and Imperial Serges, Whipcords, Diagonals, rough finished worsteds and novelty weaves in the season's most popular colors. And just as attractive as the style and durability of our garments, is the price.

Tailored Waists for Fall.

Some new and pleasing ideas that will appeal to those who are in quest of the latest. These are toilored styles with high or low neck, stiff or soft tailored collars, tucks, platts and pratty hand embroidered designs, mostly white but a few are trimmed with contrasting materials. Why Have "Nerves?"

This is the reason why women have "nerves." When thoughts begin to grow cloudy and uncertain, impulses lag and the warnings of pain and discress are sent like flying messages throughout limbs and frame, straightway, nine times in ten, a woman will lay the cause of the trouble to some defect at the point where she first left it. Is it a localcabe, a backache, a sensation of iritability or twitching and uncontrollable nervousness, something must be wrong with the head or back, a woman unturally says, but all the time the real trouble very often centers in the womanly organs. In nine cases out of ten the seat of the difficulty is here, and a woman should take rational treatment for its cure. The local disorder and inflamnation of the delicute special organs of the sex should be treated steadily and systematically. systematically.

Dr. Pierce, during a long period of practice, found that a prescription made from medicinal extracts of antive roots, without the use of alcohol, relieved over 90 per cent, of such cases. After using this remedy for many years in his private practice he put it up in form of Dr. Pierce's Favorite Prescription, that would make it easily propurable, and it can be had at any store where medicines are handled.

Mrs. Lina B. Hawkins, of Zens, Va., writes: "I had been falling in health for two years—most of the sime was not able to attend to my household duties. Fermile weakness was my trouble and I was netting very had but, thanks to Doctor Plored's medicines, I im well and strong again. I took only three bottles of 'Exvertic Prescription,' and used the 'Lotten Tablets.' I have nothing but praise for Doctor Pierce's wonderful medicines."

Fall School Term Opening Monday, September Second.

Every little boy and every little girl; every big boy and every big girl, will want something new for opening day, opening week, for everyday. We have made full preparations for this demand, and the hundsome lines of boys' suits, trousers, hats, shees and the handsome lines of girls' drosses, coats, footwear, neckwear and ribbons are the admiration of everybody that sees them. A better thing for the parents is the low prices that the Union Supply Company charge for this class of goods. You can cutfit a boy complete for say, suit \$3.00, pair shoes \$1.50, hat 50c, neckwear, suspenders, collar and necktic pair shots of the last acts, heavest, suspenders, collar and necktie, etc., \$1.00 or a total of \$6.00 complete. Good, serviceable, stylish raiment. You can outlit a girl with a nice fall, stylish, suit for the same price. You can outlit them for less if you want to. We have lower priced goods, and of course we have higher priced goods. It will pay you to see the Union Supply Company's stocks of boys' and girls'

WHY

South Connells ville Lots

Are Bargains for the Purchaser Whether he be Builder or Investor

They are the Cheapest and most Convenient suburban lots in the Connellsville market.

They are now in South Connellsville Borough, and have the guarantee of borough government for proper Streets and Sewerage at practically the same rates of Taxation as prevailed when they were part of Connellsville Township.

They already have City Water, Electric Light, Natural Gas and prompt and excellent Trolley Service. The public schools are convenient and efficient.

The little town is growing steadily and with it real estate values. It is the seat of numerous industries and convenient to all of Connellsville's mills and mines by reason of the trolley service. It is no longer separated from Connellsville by unimproved lands. The town is continuous from Connellsville to South Connellsville.

WORKINGMEN who have an ambition to own their own homes can find no more desirable location at the price.

INVESTORS looking for real estate easy to handle at promising profits will find it here.

FIRE DANGER AT SEA.

Flames Can Sweep the Inside of

Even a Metal Ship. The danger from fire on a transat-lantle liner is more serious than is gen-erally believed. It is much greater than the danger from collision and is becoming more and more dangerous with the increased outlay upon luxury and display. The main structure of the ship and most of its essential puris are of metal, but many of the fittings, neary every feature of prnament and every

No one who has not been aboard the Spaulsh wrecks at Sauliago can con-ceire how fire can sweep the inside of even a metal ship. Admiral Cervera described to me the experience on board the Teresa in these words: "The second shot that came on board set us on fire. The fire main was damaged. Soon we were unable to cope with the to stern. There was not a space as big as the paim of your hand where life could have been sustained. An insect could not have lived on board. We had

that they can't step reading long enough to eat; also it shows what a lonely town we are. Only people who live alone a great deal read anything except the newspaper at mealtime In the interests of hygiene and nesthetics those voracious readers who eram their heads and their stomachs at the same time ought to clean their books of crumbs, but they never do."-New York Press.

PINEAPPLE PLANTS.

They Do Not Die After Fruiting, but

Pineapples do not grow on trees. Imagine a plant four feet in extreme height from the ground to the tip of leaves, a single stalk at the surface, but dividing at once into swordlike biades or leaves, fifteen in number, from the center of which appears a silf, upright stem, at the top of which is the fruit. This stem is short, and the crown of the fruit when fully grown is a foot or more below the

points of the leaves. At the end of a year and a half from planting each plant produces a single fruit, even as a cubbage plant produces n single head. But the pineapple does not die after fruiting once. Down on the stem below the fruit and among the long, marrow leaves a sucker ap-pears. If allowed to remain this will other fruit. This process may go on Chapel Hill, N. C.; William C. Stubbs, for a term of years. In the meantime however, other suckers will make their

These are broken off, and when stuck into the ground they put out roots and become other plants. Thus a single plucapple plant may produce a dozen more others while it is riciding fruit from year to year.

Hindu Caste.

The four grades of society among the Hindus are the Brahmans or sacerdo tal class, who are said at the moment of creation to have issued from the Chattsee or military class, sprung from the arm of Brahma; the Vaisva or Bais or moreunille class, from the thigh of Brahma, and Sudras or Sooders or service class from the foot of Brahmo The business of the Sudras is to serve the three apperlor classes, more especially the Brahmans. Their condition is never to be improved. They are no to accumulate property and are unable by any means to approach the dignity higher classes. These division are hereditary, impassable and lade feasible.

question arose as to the best means of laying out a roadway up the steep and rocky hill, at the crest of which the house was to stand. Mr. Billings was puzzied. He wanted to make it as easy a climb as be could. He mentioned the problem to his friend W. C. Muschenheim, a New York hotel proprietor. Mr. Muschenbeim, who was familiar with the hills and dales of that part of New

Fact! Leather, findings and making has "acroplaned" and if old prices are maintained—and they will be-it's at the expense of the footwear.

We had an experience that opened both eyes to what is doing among shoemakers. We don't sell footwear that is nationally advertised—the advertising cats into the quality, and you have to pay for it, besides—so our shoes are made in factories almost under our supervision. At the proper time this summer our order—a feeler—for a hundred dozen pairs of men's shoes went in with the usual specifications regarding quality and cost.

The order was returned. Factory couldn't, without shortening its profit,

come up to our requiremeths at our price. Our shoe man had to make a special trip to the plant—and use special persuasion—to get that order accepted.
